

The Department of Education requires every school and university to record daily screening and attendance of all people entering the premises.

Momentum has a cost effective, fast and reliable digital solution, saving you time and effort.

We provide a digital screening and capturing solution, supported with telephonic medical advice, counselling and online resources.

Digital screening before returning to school

Before returning to school, learners, parents, teachers and staff complete a digital screening survey via **WhatsApp, USSD** or **online** to identify possible symptoms of COVID-19 and other vulnerabilities.

No risk persons get a digital QR code passport to scan at the school's point of entry. High risk persons will be referred to their GP, or to Momentum's Hello Doctor for medical advice.

High risk individuals will also be referred to the school's managing representative for guidance. The school has access to an excel format report of these persons.

Real-time reporting with statistics and screening responses can be viewed on a web portal. A toolkit is included with instructions.

On arrival at school every day

Individuals will scan their QR code at the point of entry. Since fever can be an indicator of the onset of illness, temperature will be scanned and recorded. The scanner will also verify that a mask is worn.

Should the school already have a temperature scanner, the temperature readings can be captured on an android device or web portal by a school representative. Real-time reporting can be viewed through the same web portal.

The management of those individuals with identified risk or high temperature readings takes place in accordance with school policy.

Resources and support services

For individuals at risk:

Access the parenting portal for resources and expert advice.

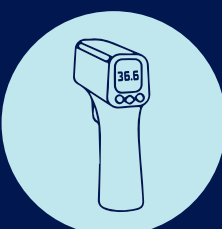

Parents, learners, teachers and staff have access to telephonic counselling and support to deal with the daily stressors related to COVID-19.

USSD number:
***120*394#**

Parents, learners, teachers and staff are encouraged to access Hello Doctor for telephonic advice should they develop COVID-19 symptoms.

For the school:

Temperature and mask scanners (High volume).

Access to reputable vendors of protective screens, masks and more.

Return to School toolkit based on Department of Health guidelines.
